LONG SPAN SHELVING

Long Span Shelving from BHD Storage Solutions is a flexible and cost-effective solution for you and your business if you need to store longer length items, as well as bulky items that don't fit into traditional shelving systems.

Long Span Shelving systems are fully adjustable and quick to assemble. BHD Storage Solutions can help you customise the system, tailoring it to your specific requirements by designing and installing a number of different configurations, including two tiers, three tiers, or multi-tiers. This allows you to create a more efficient picking system, so you can get the most out of the storage space you have available.

APPLICATIONS

A basic shelving storage system with variable widths and depths of arms on a sturdy frame. BHD Storage Solutions can also supply a range of different accessories to complete specific storage options within the long span configurations, to achieve separate storage compartments including coloured bins for individual picking such as hardware items.

FEATURES

- Engineered to capacity holding
- Powder coated for durable and industrial finish
- Option to colour match to company brand colours
- Storage accessories available to better manage your storage facility

DESIGN

& INSTALLATION

Your BHD representative will ensure the design, configuration and installation of your Long Span Shelving unit will be the most cost effective for your storage requirement. Manufactured to engineering standards and designs, using the highest quality materials. BHD's Long Span Shelving is compliant to Australian Standards 4084-2012 to meet Australian specification requirements.
