# VERTICAL RACKING

BHD Storage solutions will supply various vertical storage racks and stands that will provide maximum space saving and storage for different kinds of products. Vertical Racks are an economical method of storage that are installed quickly, will create optimal floor space and provide an easy access to stock items for picking areas.

## APPLICATIONS

Businesses storing product like timber beams, pipes, tubes, steel and long lengths of Stable product can opt for a vertical storage solution. Vertical Rack Storage Systems minimise damage to products by using dividing mechanics, a custom solution that can maximise space and offer an efficient, safe and customer friendly merchandising option.

## FEATURES

Vertical Racking (A-Frame) can be used to store any long, rigid material including:

- Ladders
- Guttering
- Decking
- Steel Extrusions
- Aluminium Extrusions
- Plastic Extrusions
- Lumber
- Timber Dowels
- Mouldings
- Timber Trim and More

## DESIGN & INSTALLATION

Your BHD representative will ensure the design, configuration and installation of your Vertical Racking solution will be the most cost effective for your storage requirement. Manufactured to engineering standards and designs, using the highest quality materials. BHD's Vertical Racking is compliant to Australian Standards 4084-2012 to meet Australian specification requirements.
