DIRECTORS DIALOGUE

Dear Valued Clients,

We welcome you to our quarterly newsletter to share BHD's latest developments and expansion of its operations.

Sept. 28th 2018 witnessed the exciting moment of BHD launching our venture into Vietnam for manufacturing of storage racking systems. The stage one production was of 10,000sqm for punching, rolling, welding and powder coating and transportation worldwide.

Two years later, we have expanded the manufacturing facility that has doubled the size of our production.

What this means to our valued partners:

- Shorter manufacturing lead time
- Higher production and quality efficiency
- Additional capacity for storage

This investment demonstrates our commitment to our clients and for our global operations.

At BHD, we will continue to expand our manufacturing capabilities to allow us to meet the future needs of our customers, while continually enhancing excellence across our business.

We'd like to take this opportunity to thank all our loyal clients for their continued support and trust in BHD Storage Solutions, we couldn't have achieved this without you.

Sincerely,
Jessica Zhu
Managing Director

BHD Vietnam Manufacturing Facility

Stage 2 Completed

BHD Vietnam Manufacturing Facility

September 28th 2018 witnessed the exciting moment of BHD launching their new venture into Vietnam for Racking Production. Eleven months later, BHD set up a fully functional manufacturing plant to meet market demand. This project sits on 24,000 sqm of land offering a complete range of racking, production, welding, punching, roll forming, surface treatment, packaging and transportation worldwide.

We're excited to officially announce that our stage-two expansion of our manufacturing facility of similar size is now complete, we're set up to provide a stable supply of premium quality racking globally.

BHD Project Delivery CW Systems

From their small warehouse to the huge facility in Sydney, BHD Storage Solutions has helped to make CW Systems expansion an easy transition.

BHD Storage Solutions designed a racking system that would allow efficient storage of window furnishing products. This included 3 runs/5 bays of 8.5mt high Pallet Racking, 1 run/4 bays single sided Vertical Rack, 1 run/3 bays & 1 run/4 bays double sided Vertical Rack as well as 28 bays of 8mt high Heavy Duty Cantilever Racking.

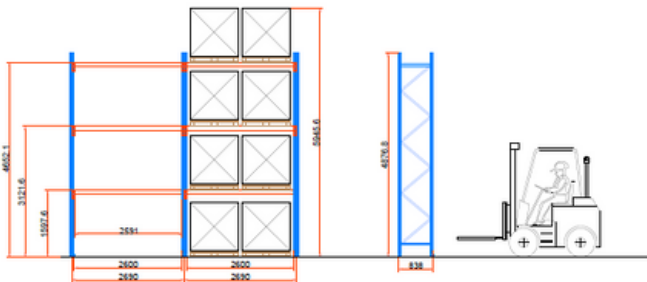

Expanding their warehouse storage was simple and affordable. Our clients are extremely satisfied with the warehousing storage systems we have provided, and they are happy to share their stories and recommend our services to others. Delivering a quality product with genuine support has helped to build these strong client relationships.

BHD's first Virtual Booth at the IHG Virtual Expo

BHD Storage Solutions successfully exhibited at their first-ever Virtual Expo in February hosted by the Independent Hardware Group (IHG). It allowed IHG members to visit the BHD booth from the convenience of their computer, laptop, phone and tablet.

BHD virtually showcased their latest storage solution developments and innovations in one of Australia's important industries. BHD connected with a national audience that delivered qualified leads to sales, overall a great experience.

Looking for Racking Systems?

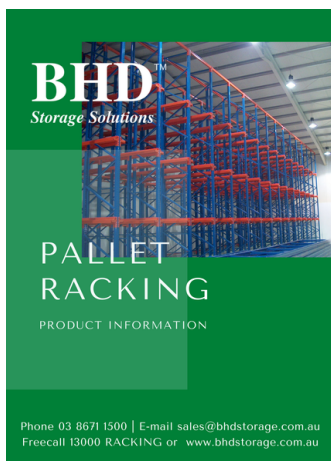

Invest in Racks

Pallet Racking maximises your warehouse space and improves business efficiency.

BHD have been manufacturing pallet racking for over 20 years, and we have total confidence in our warehouse racking systems. Our system is designed and engineered to last in the harsh warehouse environment. Pallet Racking is a stock handling storage system designed to store goods on pallets. There are many different types of Pallet Racking systems, all designed and manufactured in accordance with AS4084-2012.

Invest in racks you can count on from a manufacturer you can trust, let BHD Storage Solutions handle all your warehouse storage and racking requirements.

**from a Manufacturer you
can trust!**
