DIRECTORS DIALOGUE

Dear Valued Clients,

Let's wrap up 2021 – what a year.

This year began differently – without the usually crowded celebrations and festive events, but with an ongoing lockdown followed by the slow and steady roadmap to the lift of social distancing and travel measures.

2021 was a good opportunity to rethink how the return to the "new normal" should be, both in our personal and professional lives, and as a company, how we gain momentum in our strategic growth, further invest in our people, and innovate for the future.

So, what were the highlights of 2021, and what do we expect in the new year?

Putting our people first was more important than ever

Our priority has always been to support our people in staying healthy, connected, and productive. That's why returning to the past wasn't an option, and the only way forward was to adapt and evolve into better ways of working.

Bigger and better

2021 was a big year for BHD Storage Solutions. Despite the downturn in the economy, sales and delivery teams have managed to deliver the highest returns. Our ability to be flexible helped us to exceed our customer service offer. We had to embrace change to enhance our expertise, improve our offerings, become more resilient, and have a robust company culture.

Although we were sad to say farewell to some old friends this year, our BHD family has grown. The team has expanded to evolve our expertise and address our clients' needs in areas such as Project Management, expanding our Warehouse for additional storage space, FEM Certification, and Operations. We are proud to have a bigger and more diverse team that supports the BHD culture and principles.

We are hopeful for 2022 that the patience of the last two years will flourish opportunities in more resilient, innovative and intuitive ways. We have never been busier talking to new and existing clients about upcoming project opportunities.

A big thank you to our community of clients and suppliers for their ongoing support and the BHD team that stays motivated, adaptable, supportive of each other, and continuously improving.

May your Holiday Season and New Year be filled with great joy, happiness and success.

Sincerely,

Jessica Zhu
Managing Director

5 Things to know about Racking Systems

Space Saving

One important benefit of Racking is that it is a great space saver. Racking allows businesses to make use of the vertical space instead of floor space. Forklifts can easily access the storage racks and bring down the pallets. Maximising your storage space can save your business a lot of money.

Safety

Racking brings safety to your workplace. BHD racks are made of high-quality materials that meet industry standards. BHD will provide you with complete instructions on how to position and use the racking system to maximise safety and minimise injuries and mishaps.

Durability

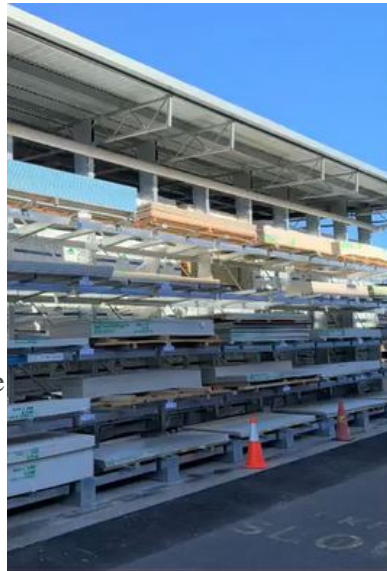

BHD Racking systems are built with high quality steel and joining materials. You will be able to use these racks for many years. Pallet racks are specifically designed to withstand the rigors of pallets being moved. These pallets are guaranteed to hold the weight of pallets being stored.

Accessibility

A Racking system is a very convenient storage system. It is set up for efficient and productive work environment. These racks are designed to help your business store more materials and access them easily. Racking systems will help you get things done faster and increase the safety standard of your workplace.

Convenience

Accessibility of stored materials is one of the most important factor in warehouse, factories and retail stores. Racking systems are set up to be easily accessible by forklifts. Properly designed Racking systems can provide plenty of space for forklifts to move around and access materials easily.

**5 THINGS TO KNOW
ABOUT
RACKING SYSTEMS**

Cantilever Racking Canopies, Cladding & Curtained Doorways

Protect your Cantilever Rack from the harshest weather conditions by choosing from Cantilever Racking Canopies, Cladding & Curtained Doorways.

If you are experiencing limited space inside, this is the external option. An external Cantilever sheet material rack, fully cladded with roof and curtain, are available in various sizes.

Our Cantilever Racking can be erected with a variety of options, such as Cantilever Racking Canopies, either with or without cladding or curtained doorways, so your industrial storage is well-protected from the harshest of weather conditions.

Give your stored products an excellent standard of weatherproofing by choosing from:-

Canopy only

Canopy with rear cladding

Canopy with end cladding

Canopy with rear and end cladding

Optional curtained doorways

Reduce costs, increase capacity, improve efficiency and protect your stock with our Cantilever Racks with Racking Canopies and Cladding.

BHD Storage Solutions will help you to achieve these goals and much more by using our weather protection systems. We have years of experience and knowledge of the industry, so we consider all relevant conditions and factors to ensure the optimum installation to meet your business needs.

"We've got Storage Solutions that fit."

Project Delivery - Team Transport & Logistics

Team Transport and Logistics is a team of transportation specialists based in Brisbane and providing a range of heavy haulage, transport and distribution services. TTL has offered expert support with its logistics and transportation services to BHD Storage Solutions.

The Requirement

TTL required new racking to accommodate their growing storage needs.

Our Solution

BHD Storage Solutions proposed a storage solution of pallet racking to store 1.9 metre high pallets by maximising the warehouse height, installing 7.315 metre frames allowing a total storage capacity of approximately 1,400 pallets. This suited the warehouse's design and offered the best balance between budget and quality.

Project Delivery - Ullrich Aluminium

Ullrich Aluminium Distribution Warehouse product range was growing, and a highly efficient storage solution became a priority. Ullrich Aluminium required the best design, supply, and installation of their new Cantilever racking. Due to the size of the warehouse, the racking installation was completed over three stages. The last stage included a mixture of 9mt and 6.8mt high columns with narrow isles to double storage capacity.

In-depth planning for the timing of the staged installation was required to ensure the tight deadlines were met.

The team at Ullrich Aluminium are thrilled with their space-efficient, fit for purpose new warehouse storage.

If you need some advice about specialist storage equipment for the retail, commercial or industrial use, don't hesitate to contact us to discuss your plans.

Planning a Successful Business from the Ground Up

No matter what your industry, BHD Storage Solutions has the experience and expertise to help you manage your intralogistics challenges. Our team work collaboratively to help understand your specific needs so we can deliver solutions that increase productivity and deliver a strong return on your investment.
